ABCD Any Body Can Dance is a compilation of six different stories, all of which showcase the power of dance to bring people together. In this film, Prabhu Deva plays a character who acts as a narrator for these stories. Prabhu Deva is from India and has been one of the pioneers in Indian dancing for years. He is known worldwide for taking traditional Indian dance and mixing it with modern hip-hop and popping styles. The first story introduces us to a religious sect of society. These people, who are followers of Swamiji, are highly superstitious about the world around them. The children in this group are forbidden to take part in any dance programs or other activities that involve movement. The first story shows the power of dance again when these kids secretly become involved with a dance competition for schools and all of them end up winning 1st place due to their hard work and practice. Having done this, they realize that they were wrong all along and begin accepting dance as an important part of their lives. They also express thanks to Swamiji for allowing them to compete regardless of his earlier rules because it helped them grow as individuals. The second story is about two orphans who live in a shelter-house in Bombay. The shelter-house protects the children from dangers in the streets, but they are still unhappy because they do not have any role models to look up to. They hate their situation and often wonder what they will be when they grow up since there seems like no future for them. That is when their trainers at the shelter house suggest dancing as an idea for their very own talent shows. This immediately makes them happy and they participate in dance competitions, beating all of their competitors due to their incredible work ethic.
